

Mad Scientist 7th grade

You are a mad scientist and you are to create a super bug that will invade humans and protect them from sun damage.

- A. You are going to demonstrate the effects and protection your super bug will cause to the human body.
- a. You will do the following...
 - i. Create a drawing/picture of your Super Bug
 - ii. Create a name for your Super Bug
 - iii. I want you to become your Super Bug. You are going to write a story as if you were the Super Bug. Make sure to answer the following questions, but don't forget the point of view of the story. It is that of the Super Bug. Answer the following questions in your story...
 1. Where does it live in the body?
 2. How does your Super Bug spread? How does it enter the body?
 3. What is it doing in the body to help it protect the human from sun damage?
 4. How does it grow or multiple?
 5. What are the signs of the Super Bug that show it is working?
 6. How long will your Super Bug work within the body?
 7. If for some reason your Super Bug needed to last longer, how can the body make the Super Bug last longer and why would it need to make the Super Bug last longer?
 - iv. Be very specific with your answers.
 - v. Minimum of 5 paragraphs
 - vi. The story must make sense, use relevant descriptive details and well structured event sequences.

Objective:

7.PCH.1.2 Explain environmental, psychological, and social factors affecting excessive sun exposure
